EMILIO OTTONELLO

MECHANICAL ENGINEER

ABOUT

I am a novice mechanical engineer; I am entering the adult world for the first time, and I would be a liar if I did not admit to having a certain amount of fear with me. However, I also have a strong spirit of initiative that is eager to be known and appreciated.

WORK EXPERIENCE

In recent years, I have been working at work for several reasons, such as economic independence. I have been a waiter, a bartender, a tutor, and other small jobs; these activities have been able to give me so much in terms of empathy.

I'm working as a PhD student at the Italian Institute of Technology.
My research field is the application of additive manufacturing in advanced robotics.
