WORK EXPERIENCE

01/10/2014 – CURRENT Netherlands

SENIOR HEALTHCARE CONSULTANT BETER HEALTHCARE (PART OF IG&H)

- Program manager for several regional health(care) coalitions implementing the new national health(care) collaboration guidelines. These coalitions consist of multiple municipalities, healthcare and long-term care providers, primary care providers, public health organizations, mental health professionals and pharmacists. The coalitions are aimed at improving continuity of care through digital interventions and information exchange.
 - o Responsible for translating national policy and (forthcoming) laws and regulations to the regional context.
 - o Continuously sharing knowledge (both remotely and in person) between all stakeholders (~150 persons) and incorporating their feedback into the program design.
 - o Acquisition of funding from the Dutch government in order to finance the program (>1,5M EUR).
 - o Responsible for managing the budget.
 - o Responsible for the implementation of personal health environments and creating an information architecture that improves continuity of care.
 - o Responsible for the go live of the first region in the Netherlands with standardized digital nursing transfers.
- Senior advisor to the Dutch Regional Public Health Services (GGD's) on how to improve their services related to sexual health by deploying digital solutions.
 - o Analysing and selecting relevant (inter)national innovations to improve the monitoring of sexual health within their population.
 - o Responsible for aligning the 25 sexual health centres and acquiring consensus regarding the need for a national electronic health record (EHR). Responsible for the selection of the national EHR for the sexual health centres.
- Advisory and research work for the Dutch Ministry of Health, Welfare and Sport.
 - o Collection and analysis of input from stakeholders within governmental organisations, care providers, policy think tanks, patient federations, and informal care networks to achieve both quantitative and qualitative insights.
 - o Researcher and co-author of a social cost-benefit analysis regarding the digitalization and standardization of transfers between nursing professionals.
 - o Co-author of two guidelines for the implementation of personal health environments to improve quality of care and enable shared decision making between patients and healthcare providers. The guidelines are now part of the programs being implemented in the Netherlands.
- Consultant and implementation manager in three hospitals.
 - o Responsible for planning, budgets and execution.
 - o Optimization and implementation of Electronic Health Record systems, including patient logistics, perioperative care and emergency care.

01/09/2022 – 01/07/2023 Uppsala, Sweden

PROJECT COORDINATOR IN THE INTERNATIONAL CHILD HEALTH AND NUTRITION RESEARCH GROUP UPPSALA UNIVERSITET

Coordinator for the PREVENT project that is aimed at preventing cardiometabolic diseases amongst high-risk populations in three socio-economically disadvantaged neighbourhoods. This project is a collaboration between Uppsala universitet, Karolinska Institutet and the regional and local governmental bodies of Uppsala.

- o Responsible for organizing co-design workshops with local stakeholders.
- o Writing grant applications.
- o Organizing community activities.
