

MY EUROPEAN UNIVERSITY

Meet the people engineering a sustainable future for Europe

“We are keen to overcome together the boundaries of traditional education and research”

How did you come to join the EELISA project?

Since the very beginning, I academically embraced the enthusiasm of the Scuola Sant’Anna to be part of EELISA European University. My role as the Vice-Rector of the Scuola Sant’Anna, together with my background in biorobotic engineering, has engaged me at the forefront of the designing of the EELISA Alliance.

Tell us what it brought you.

I am proud to have seen EELISA grow before my eyes, laying the foundations for an increasingly consolidated pan-European academic network. I gladly recall the signature of the bilateral agreements among the Scuola Sant’Anna and the EELISA partner institutions as a significant landmark of international cooperation in EELISA. Under these agreements, the School and the EELISA partners have mutually committed to foster and encourage joint research activities, exchange of teachers and students for training and research activities.

3 words to describe EELISA;

Thinking, outside, the box.

Why do you think people should join EELISA?

To take advantage of spaces for dialogue with international partners, diverse in scale and scope, trying to catch fuelling factors to contribute to the evolution of the Scuola Sant’Anna towards an increasingly bigger European dimension, for the education of the Renaissance Engineer.

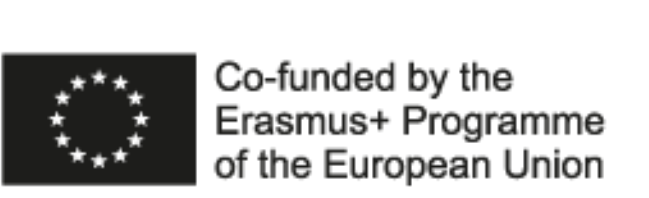

Arianna Menciassi

**Vice-Rector of the Scuola Sant’Anna,
Full Professor of Biomedical Robotics**
