

MY EUROPEAN UNIVERSITY

Meet the people engineering a sustainable future for Europe

“Enhancing interchange among european students, for a more sustainable future”

How did you come to join the EELISA project?

I came to know the EELISA project when I was still in high school, thanks to the website of Scuola Sant’Anna. It is, in fact, one important reason for which I applied here. I then joined EELISA since my election in March 2023 as the SSSA Student Representative. I decided to run for it after other students’ advice, who told me that EELISA was an incredibly stimulating and interesting opportunity. I can now happily confirm this, since the EELISA project allowed me to meet countless students from all over Europe, and made me promote numerous challenging projects in my University, as well as partner universities.

Tell us what it brought you.

What caught me the most was the way of presenting the project as a road to creating a new model of “Renaissance engineer”, which I think should be the point of a well-built education. I hope EELISA will contribute, as it is already doing, to the upbringing not only of expert technicians and innovators, but also of all-round people with a great sensibility for the well-being of society and the interchange between natural beauty, technological advance, and internationality.

3 words to describe EELISA:

EELISA is New, Open and Active

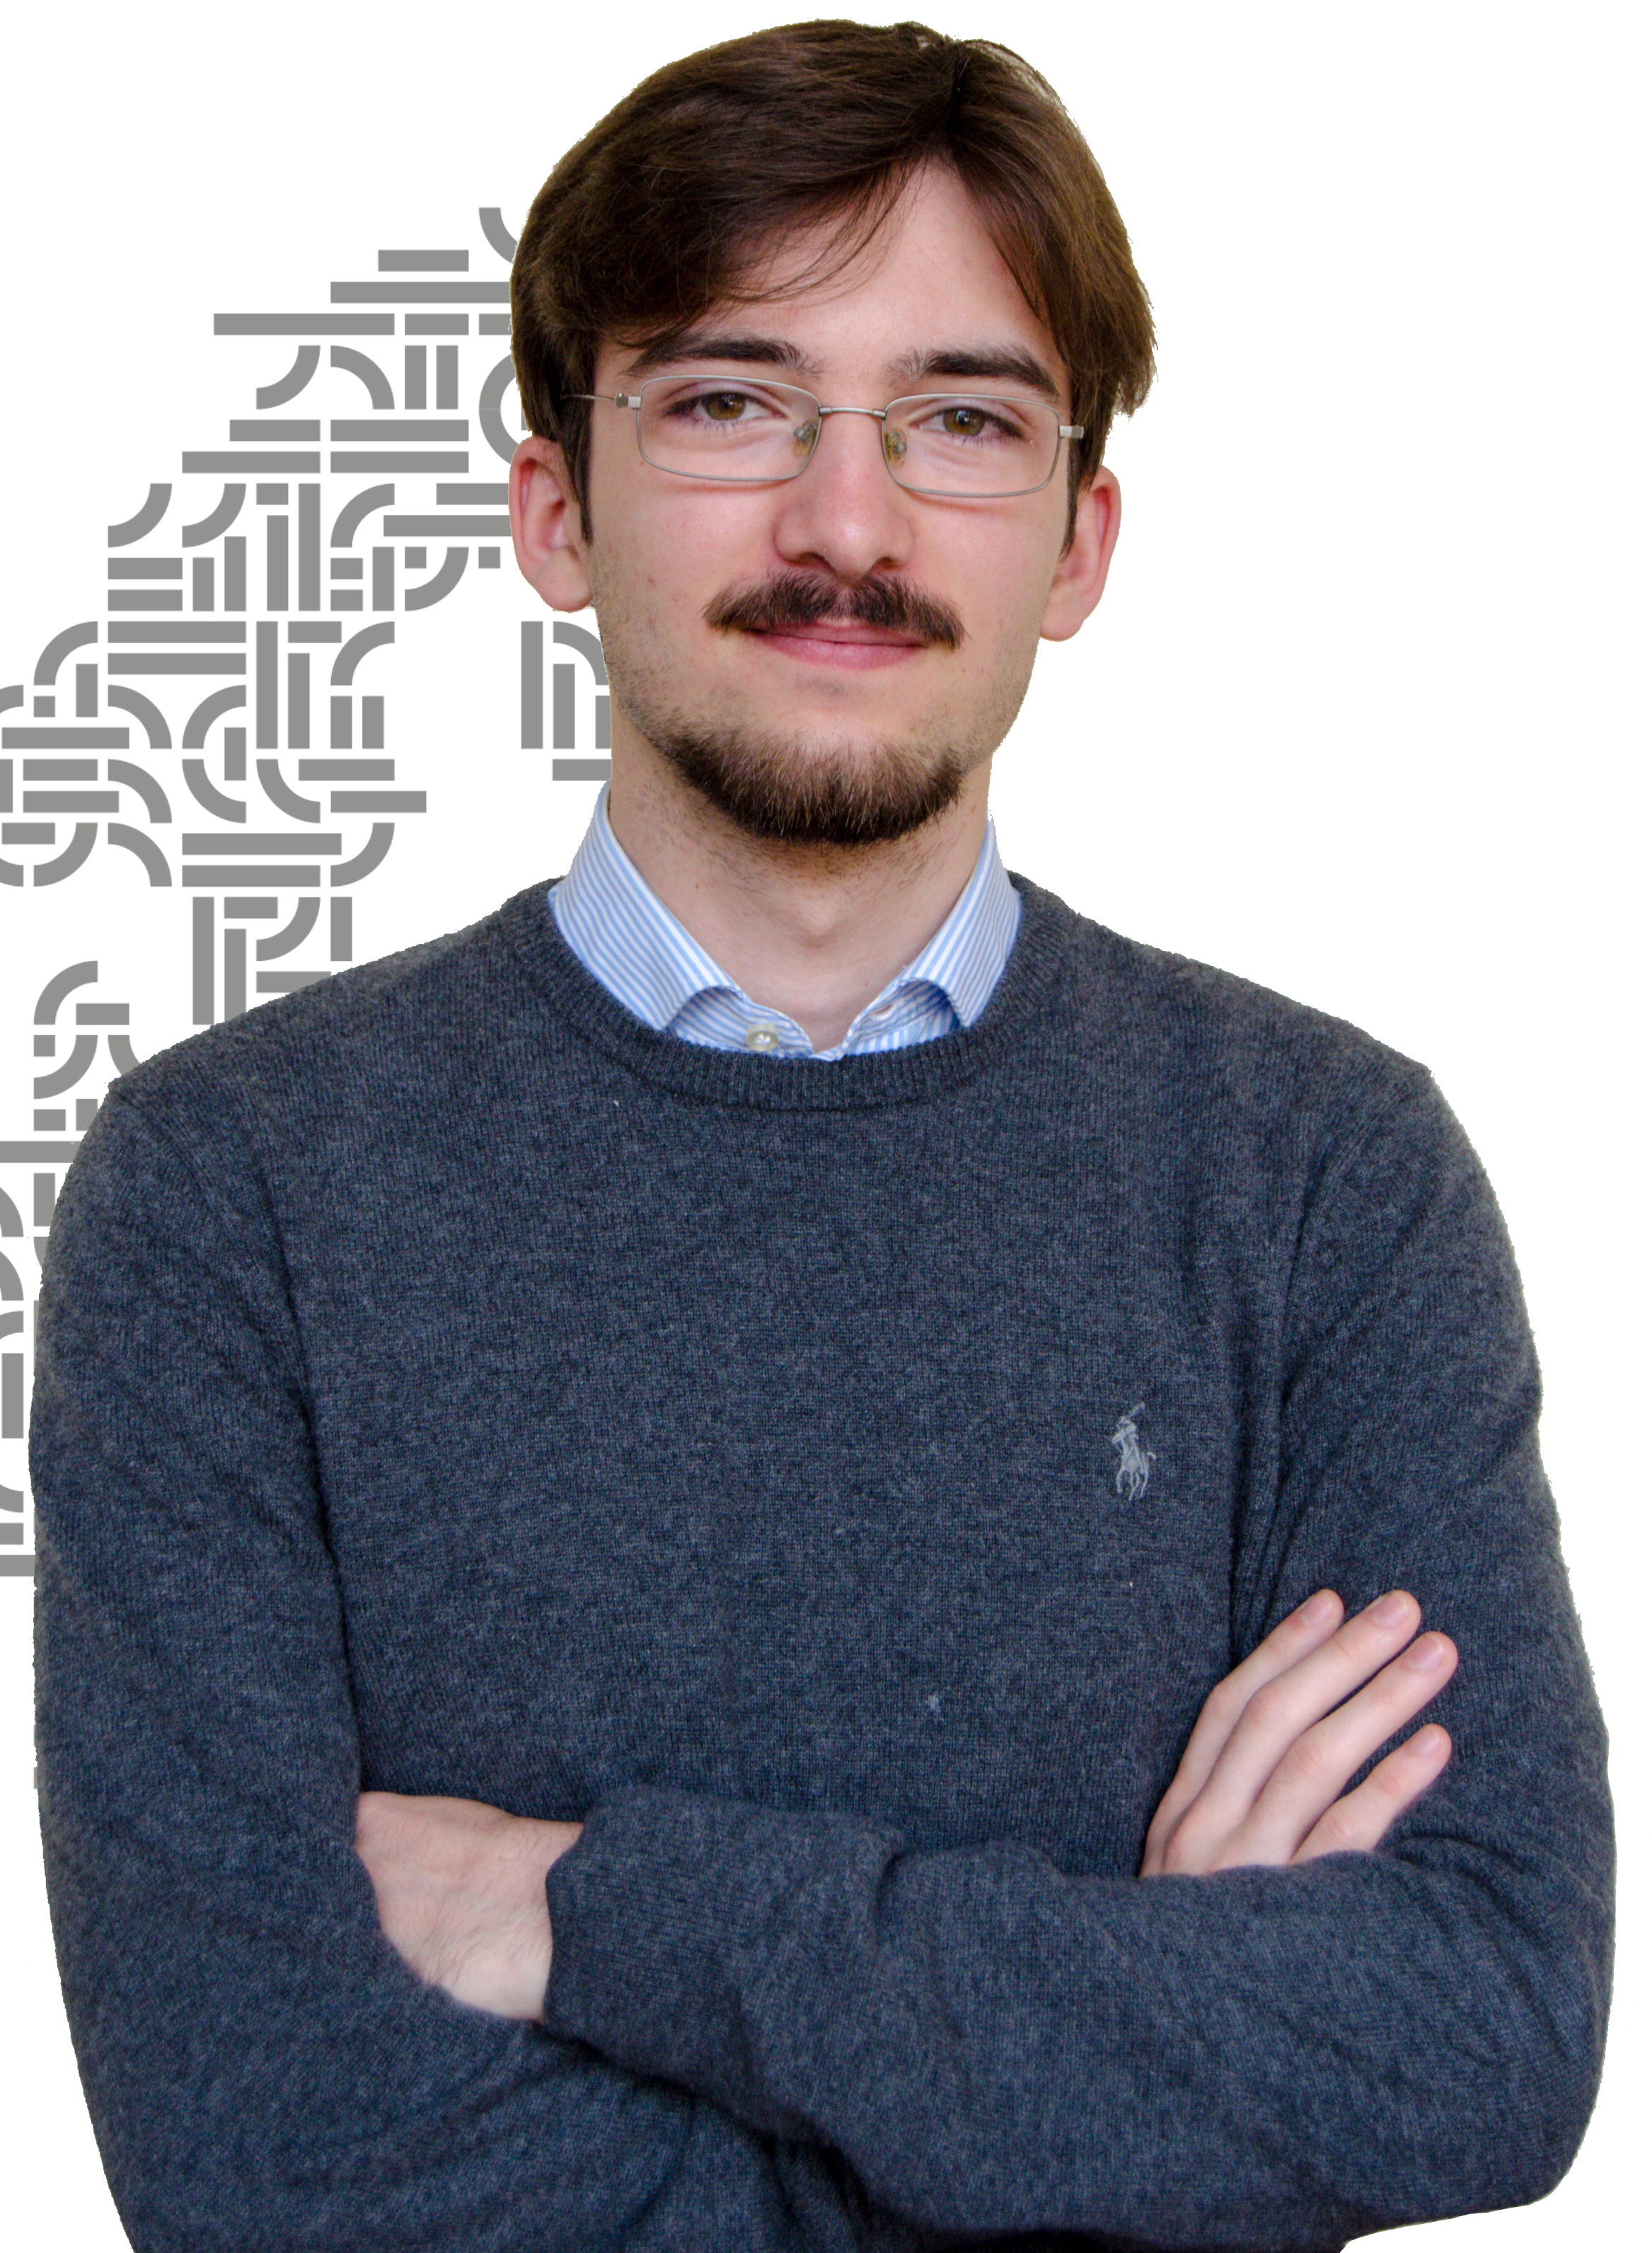

Why do you think people should join EELISA?

I can say, with the utmost confidence, that it is now the best way to enhance student mobility in Europe, and work with other young minds from many other countries. Furthermore, from an academic point of view, it gives you the chance of attending numberless courses from partner universities, which would otherwise not be easily accessible. So, I would say it is quite the turning point when it comes both to international experiences and to learning opportunities. If you believe in a deeper interchange between European universities and faculties, and if you think that a multidisciplinary and international environment is fundamental for an enriched experience of your education, then EELISA is definitely the place for you!
