

21 - 22 March, 2024
Pisa

CALL FOR PAPERS

*Bridging the gap between neurorights and cyberrights:
introducing new ethical and legal safeguards for
protecting humans in the digital era*

Topics

Topics of interest include (but are not limited to):

- Present and future technological challenges for humans rights in the digital era
- Grounds, scope and aims of “cyberrights” and “neurorights” and their possible interactions
- Autonomy and (technological) manipulation as philosophical and legal concepts
- Mental Integrity, Psychological Continuity and Cognitive liberty as philosophical and legal concepts
- The evolving notion of privacy in the digital era
- Digital (neuro)surveillance between “cyberrights” and “neurorights”
- Personal identity and freedom of thought
- New kinds of “harm” to the person brought about by AI systems
- Ethical and legal implications of human-technological hybridization
- The use of neurotechnologies in criminal justice (policing, sentencing, trial...)

How to apply

01

Participants can submit their abstract in English (500 words) and a short bio to cyber.neurorights@santannapisa.it by **28 January 2024**.

02

Results will be notified by **11 February 2024**.

03

Selected presenters will be expected to present their research in English in presence in **Pisa**.

The Dirpolis Institute of Sant’Anna School of Advanced Studies and the Digital Humanism Research Network (Sant’Anna School, UniSOB - Centro ReCEPL, Università del Salento - Centro DH) are glad to announce the international conference “Bridging the gap between neurorights and cyberrights: introducing new ethical and legal safeguards for protecting humans in the digital era” to be held in Pisa on 21 and 22 March 2024. The conference will provide an opportunity for young researchers (PhD students, post-docs, early career researchers, ...) to present their research in a stimulating and open environment, and to discuss their ideas with selected speakers and colleagues: we are looking for contributions that fit into the dialogue between ‘neurorights’ and ‘cyberrights’, from a legal or a philosophical perspective.
