

Summary of the Rector's Decree no. 217 of April, 08, 2022

CALL FOR APPLICATIONS FOR ONE ASSISTANT PROFESSOR POSITION

The Sant'Anna School of Advanced Studies - Pisa (Sant'Anna School) announces a call for the recruitment of **one assistant professor** (ricercatore a tempo determinato) with full time temporary contract pursuant to Italian Law no. 240/2010, art. 24 paragraph 3 letter A:

This position will be recruited in the frame of the interventions of the Piano Nazionale di Ricerca founded by Ministerial Decree no. 737/2021 and will be assumed at the Academic Class of Experimental and Applied Sciences in the Academic Recruitment Field " AGRICULTURAL CHEMISTRY, AGRICULTURAL GENETICS AND PEDOLOGY" (07/E1 "Chimica Agraria, Genetica Agraria e Pedologia") – Academic Discipline "AGRICULTURAL GENETICS" (AGR/07 "Genetica Agraria") at Life Sciences Institute.

Research activities: The new Researcher will carry out activities as part of the project entitled "Promoting Resilient, Inclusive and Safe CoMMunities in the Horn of Africa: in search of mutually beneficial solutions - PRISMA", a multidisciplinary initiative involving eight research groups with expertise in agronomy, international law, political science, economics, health management and biorobotics. The main objective of PRISMA is the development of integrated, knowledge-driven strategies to improve resilience to climatic, political and health stressors in Africa, to address food insecurity, recurring conflicts and human rights violations. In this multidisciplinary and transdisciplinary approach, the new Researcher has the dual function of expert in Agricultural Genetics and coadjutor to the project coordinator for the integration of the different research approaches into a coherent and comprehensive vision. In the first function, the new Researcher will implement innovative methods of advanced quantitative genetics, through the analysis of structured and unstructured genetic populations, which allow the identification of genes that control traits of agronomic interest and genes of adaptation to particular environmental conditions. The combination of genomic information, climatic data, phenotypic analysis and participatory approaches will form the basis for the development of new models of genetic improvement and genomic prediction. In the second function, the new Researcher will carry out activities of coordination between the different working groups and will organize the dissemination of the main results achieved, also through the management of a dedicated web page.

The assistant professors will contribute to teaching activities within the Scuola Superiore Sant'Anna teaching programs (Undergraduate, Master, Seasonal Schools and and Ph.D. students)

Duration of the contracts: three years.
